Companion - Premier Standard

Semi-Automatic Inclined Platform Lift

The **Companion Premier Standard** has been designed to accommodate a small change in floor levels, up to a height of 2880mm for use on stairs with an incline angle between 20 and 45 degrees. The unit is electro-hydraulically operated, with soft start and stop and mechanically and electrically interlocked barrier arms located at waist height across both ends of the lift. The platform is accessed over mechanically operated ramps which form wheel stops when the lift is in motion, automatically lowering at the appropriate landing to form an access ramp.

The **Premier** is finished in Light Grey enamel paint and is operated by light touch 'hold to run' buttons. It is easy to relocate for a left or right hand stairway and can be installed internally or externally. However, thought does need to be given to the security and safety of the unit.

CAPACITY Kg	MAXIMUM TRAVEL (VERTICAL) mm	DEPTH TO WALL FOLDED mm	PLATFORM SIZE mm		FLOOR AREA REQUIRED AT LOWER LEVEL (mm)		TRAVEL SPEED M/s	HEADROOM REQUIRED mm
			LENGTH	WIDTH	LENGTH	WIDTH		
150	2880	270	900	760	1500	970	0.1	1850

Would you like an estimate?

Please fill in the panel below and send it to us at the address shown. Or, phone to speak to one of our sales engineers.

	A Nose to nose		mm
	B Total depth of riser		mm
	C Total Height		mm
	D Height of first riser		mm
	E Height of top riser		mm
	F Free space in front of the stair way		mm
	G Free space after top riser		mm
	H Width of stairway (free space)		mm
	I Number of risers (elevation)		st

Features

- **Power Supply**
240 Volt single phase
10amp fused isolator.
- **Control Voltage**
240 Volt via transformer.
- **Power Pack**
Located as close as possible and in full view of the lift, but no further than 5m away.
- **Operation**
Vertical storage and lowering of platform is manually operated and balanced using compression springs.
