

Use the finishes of your home doors for the door of your H400

It can be customized with a wide variety of floor, wall and door finishes, to match the architectural style and the interior decoration of your home.

Suitable to any building type, new or existing, inside or outside, with or without self-supporting structure

^{*} Possibility of extending the warranty up to 10 years. For further information please call the phone number overleaf

the Machine Directive 2006/42/CE.

1. H400

Structure

GMV can provide steel structures for indoor or outdoor use, with any possible finish (steel or glass), perfectly matching any new or existing building type. The technical structure specifications are calculated depending on each installation, in compliance with any national standard or regulation.

Landing doors

Door models available: power operated doors 2AT-2AO-3AT, hinged doors (car bus door and manual at landings), manual doors (without car door). Available finishes: Polimod, Plastic laminate, Plastic coated sheet steel (Skinplate), Stainless Steel, Panoramic glass or RAL painted. Quick and easy to assemble and adjust

1008 SL Jack Maximum shaft optimization. Less fluid quantity used. Quick and easy to install thanks to its design.

Lift car

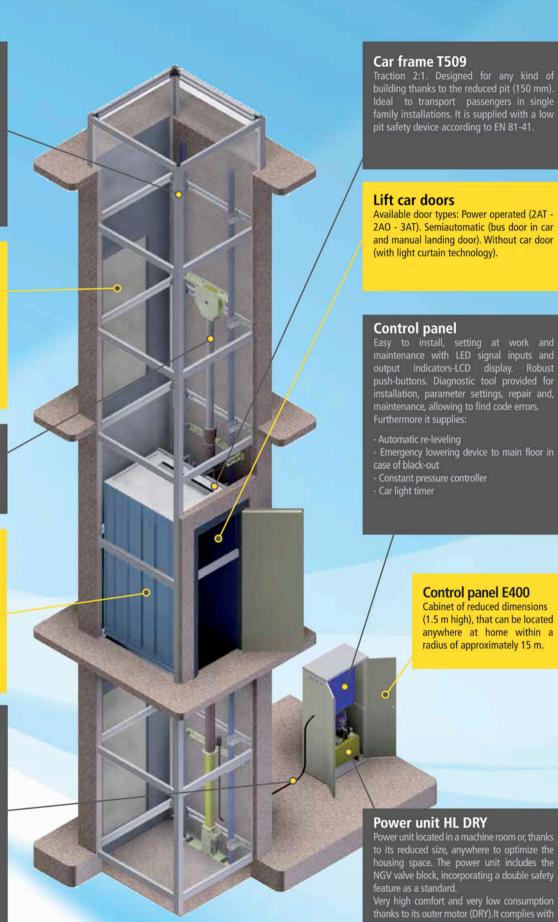

Designed to fit into any furnishing type. Car wall panels available in Skinplate, Plastic Laminate or Stainless Steel. Several ornamental solutions are possible. Very robust floor and roof. Car lighting available with led or fluorescent neon tubes. Easy access to the shaft through a hatch in the

Flexible hose

Designed with inner synthetic rubber coat, with one or two high resistance spirals. The outer layer of synthetic rubber provides excellent resistance.

Bio-degradable ecological fluid

It guarantees the best results and very high performances over the years. It betters the performance of the NGV valve. Best filtration with or without water. Excellent anticorrosion, anti-oxidant and anti-foam results. Very low freezing point.

Without machine room (MRL)

Fully Compliant with European Directives and standards

Environmently friendly with high Energy efficiency Safety

A lift that can be 100% customized

Without machine room (MRL)

2. Advantages and features of the H400

	na reatures of the 11400		
Comfort	only Home Lift in the market with an MRL solution (Machine Room Less) with NGV ctronic valve and with bio-degradable eco-fluid ilable with adjustable speeds. Max. speed up to 0,3 m/s (optional). tion: Speed > 0,15 m/s only possible outside the European Community.		
Accessibility	eliminates architectural restrictions		
Safety and fully compliant with the standards	puble integrated safety device as standard, complies with the Machine Directive 2006/42/EC, eeting EN 81-70 standards (accessibility). Incorporated automatic return to floor.		
Available motors and voltages	Single - phase and three - phase.		
Self-supporting structures (optional)	Easy to install.		
Shaft	Up to 69% of the space can be used.		
High Energy efficiency	Low Energy consumption (in compliance with the Kyoto Protocol). The used energy is like that of a 230 V standard household appliance.		
Environmently friendly	It can be used with bio-degradable eco-fluid up to 90%.		
Flexibility	It can be 100% customized . Adaptable to each customers requirement: - Wide range of doors available: power-operated, hinged semi-automatic, manual landing doors with the same finishes as the apartment doors, etc Wide range of aesthetic finishes		
H400 FEATURES			
Suspension	2:1		
Payload	250 Kg - 320 Kg - 400 Kg		
Max. n° of passengers	5		
Max. n° of stops	5		
Max. travel	14 m		

Max. speed 0,15 m/s **Motor power** 1,5 - 2,6 kW Min. pit 150 mm Min. headroom 2500 mm (without car door); 2700 mm (with car door) 2600 mm (2 panel) **Lift car** (standard sizes) (width) 670: 1400 mm; (depth) 700: 1400 mm Cabinet (optional) Sizes: 700 x 400 x 1500 mm (LENGTH X WIDTH X HEIGHT) **Energy efficiency** The used energy is like that of the most common household appliances **Ecology** (optional) **Eco-fluid** Standard Machine Directive 2006/42/CE (safety) - EN-81.41 (accessibility)

3. Standard equipment

Hydraulic power unit

Power unit HL or HLV with mechanical valve or, as an option, with NGV electronic valve, that provides higher safety and energy efficiency.

Reduced consumption thanks to its outer motors (DRY).

Double safety system incorporated as standard.

Leveling and electrical emergency system.

One stage jack (1008 SL piston).

Hydraulic equipment calculated according the EN 81-2 standard. Flexible hose

Car frame 2:1 (T509 model).

Instantaneous safety devices to increase safety.

Deviation pulley and traction cables.

Pillars and stand base.

Mechanical device to perform the trial test for the rupture valve.

5 mm guide rail thickness.

Electrical equipment

Fully automatic push button controller and hold-to-run facility on the car. EMC certificate.

Pre-wired cables (plug-in play). Automatic return to floor.

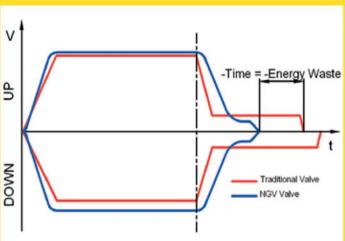

Single-phase motor 50/50 Hz. Car light timer.

Landing doors

Hinged semi-automatic doors.

Certified door locks.

Bi-stable contacts at main floor.

Standards

EQUIPMENT IN COMPLIANCE WITH EN.81-41

Pressure switch

Interphone or intercom inside the car

Hand pump

Hold-to-run operation

Handrail

Light curtain as per EN.81-41

Specific information labels as per EN.81-41

Safety device for reduced pit

Door clear width: 800 mm

Lift car sizes as per EN.81-41

Set of electrical switches

Horizontally sliding power-operated doors with door operator

Minimum car size: 1000 x 1250 mm

Side handrail

Half wall mirror

Precise floor leveling +- 10 mm as per EN 81.41

Push button boxes as per EN.81-41

Vocal indicator at floor arrival, acoustic and visual indicators

Safety

Double safety device integrated as standard in the valve block, complying with the Machine Directive 2006/42/EC. Instantaneous safety device to increase the safety.

Valve block according to the EN.81-2 standard.

Pipe bursting valve with EC certificate.

Device for reduced pit for the maintenance phase.

Visual and acoustic overload indicator.

Light curtain at each entrance.

Electrical equipment:

Control panel

Hold-to-run operation up- and down

Push button box at every floor

Emergency stop push button

Alarm push button

Emergency light

Quality

List of the available certificates:

EMC certificate for the controller and the NGV electronic valve block

Certificate for the fire-rated landing doors

EC certificate for: pipe bursting valve, landing door locks and Safety devices in the car frame

Standards:

Machine Directive 2006/42/EC EN.81-41 and EN.81-70 (optional)

EN.81-58

Car components

CAR COMPONENTS	RANGE OF FINISHES			
Walls	Skinplate	Plastic Laminate	Satin stainless steel	
Skirting	Satin stainless steel			
Corners	Skinplate	Satin stainless steel		
Floor	PVC			
Push button box	Stainless steel full height panel			
Safety	Light curtain for every entrance			
Ceiling	Curved plexiglas			
Lighting	Neon			
Mirror	Half wall mirror

Walls: Durmast
Lighting: Domino
Floor: PVC

Walls: Dark grey Lighting: Neon Floor: PVC

Walls: SB stainless steel Lighting: Neon Floor: PVC

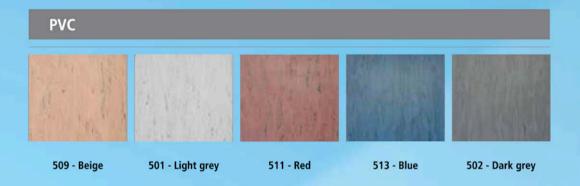

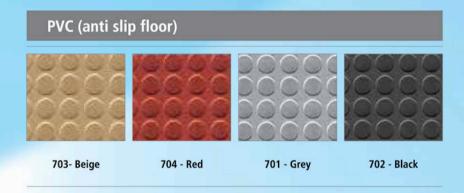

5. Finishes: Colours and materials

Floor

The Lift car floor can be prepared with 20 mm undercut to allow the customer to fit their own lining

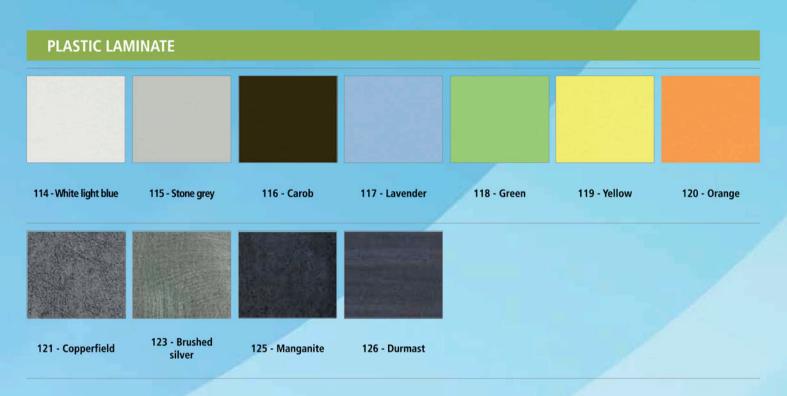

Ceilings

GMV offers two different types of lighting available with any car dimension:

Walls

Door types

Car and landing doors

Finishes like " Car walls" (see page 14)

6. Options

LIFT CAR OPTIONS

Ceiling: curved plexiglass and Neon lighting

Ceiling: stainless steel and Led lighting

Half wall mirror

Full wall mirror

Stainless steel handrail

The Lift car floor can be prepared with 20 mm undercut to allow the customer to fit their own lining

Phone

Customized logo

Key in car

Display in landing and car push button boxes

Car doors: two-speed 2AT/2AO/3AT

Car doors: Power operated bus doors

Landing doors with any RAL finish

NOTE: For other options please call the ELA sales office

ADDITIONAL OPTIONS

Power unit type HL 3010 Dry

NGV programming tool

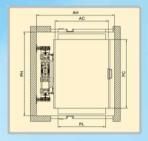

E400 cabinet type

Eco-fluid

Light curtain

2 entrances

Use the finishes of your house doors for your Home Lifty door

Self-supporting structures for indoors and outdoors

OTHER ADDITIONAL OPTIONS

Door clear width different from the standard

Door clear height different from the standard (2000 mm)

Guide rails 2500 mm long

Automatic system for hinged doors

Remote control

7. Structures

If a steel structure is required, ELA offers a wide range of options suitable for both indoor and outdoor use.

Modular design

The modular design enables various steel structure shapes to be adapted to the cosmetic requirements of the building, i.e. square (standard), rectangular, polygonal, round-shaped, etc. Thanks to their high flexibility the steel structures perfectly fit to any situation. The reduced installation time will also mean a reduction in installation costs.

Tailor-made structure

Each structure is individually designed. This allows optimum performance and safety. A wide range of finishes are available for both internal and external use, which can be adapted to suit the style of the building and the house (panoramic structures, various types of claddings), etc.

Reliability and safety

The steel structure is self-supporting: this means it does not allow tension or vibrations to be transmitted to the building during the lift operation, thus avoiding the forming of cracks.
